Furniture Care Tips

- Rearrange furniture occasionally to ensure even use of the cushions and wear areas.
- Arrange furniture so it is not placed in front of or over heating or air conditioning vents or directly under windows.
- Reverse, fluff and flip any loose cushions weekly to allow for even wear. Vacuuming with your brush attachment is also helpful.
- Caution those wearing clothing with transferable dyes, such as blue jeans, that the dye could transfer onto light colored fabric.
- Protect fabrics from sun. Ultraviolet light (sunlight) will cause fiber degeneration and color-fade.
- Avoid placing fabrics in direct sunlight, as this may cause fading.
- Occasionally, dyes even fade from impurities in the air.
- Keep pets off the furniture. Pet urine and pet body oils can be difficult to remove.
- Use proper care with a structural weave fabrics (design created by weave) to protect against snags.
- Remove unwanted pills with a fabric shaver. Pilling is normal for many fabrics when they shed excess fiber. A fabric shaver can remove unwanted pills.
- Never drag or push furniture. You should always lift your furniture to avoid damage to the furniture and floors.
- Dust frequently. Use a quality furniture polish and polish once a month.
- Clean up spills immediately. Use a blotting action rather than a wiping action.
- Use pads, cloth or felt to protect the furniture surface from plastic, rubber, hot dishes, beverages, bookends, flowerpots and vases.
- Occasionally rotate accessories so they do not remain in the same spot for extended periods.
- Lift objects. Do not drag them across surfaces.
- Use a protective pad when using your furniture as a writing surface (especially when using a ballpoint pen).
